

lab 4: Product Inventory Management

1. Create the Dataset Bar Graph

Code:

```
product <- data.frame(  
  ProductID = c(1,2,3,4,5),  
  ProductName = c("Product A","Product B","Product C","Product D","Product E"),  
  Quantity = c(250,175,300,200,220)  
)  
  
Product  
  
barplot(product$Quantity,  
  names.arg = product$ProductName,  
  col = "skyblue",  
  xlab = "Product Name",  
  ylab = "Quantity Available",  
  main = "Product Inventory")
```

Output:

2. Stacked Bar Chart

Code:

```
product$Category <- c("Electronics","Electronics",
```

```

      "Furniture","Furniture","Clothing")

qty <- matrix(product$Quantity, nrow = 1)

colnames(qty) <- product$ProductName

barplot(qty,

      col = c("red","blue","green","orange","purple"),

      main = "Stacked Bar Chart of Product Categories",

      xlab = "Categories",

      ylab = "Quantity",

      legend.text = product$ProductName)

```

Output:

3. Scatter Plot (Price vs Quantity)

Code:

```

product$Price <- c(500,700,400,650,550)

plot(product$Price,

      product$Quantity,

      pch = 19,

      col = "blue",

      main = "Product Price vs Quantity",

      xlab = "Product Price",

```

```

ylab = "Quantity Available")
text(product$Price,
      product$Quantity,
      labels = product$ProductName,
      pos = 3)

```

Output:
